Tankless...Endless Comfort

# Amazing Performance

## World's Most Advanced Tankless Technology

With a Noritz tankless water heater you will get endless hot water. Tankless water heaters heat water on demand, and that means you never have to worry about running out of hot water. Imagine the luxury of always having enough hot water to enjoy a relaxing shower or fill a hot tub and still have an endless supply of hot water for the rest of your household needs.

### Sustained Strength

Noritz has topped worldwide tankless sales year after year over other tankless companies. This continuous growth is due to Noritz's commitment to developing tankless technology.

### Continued Growth

Noritz has been developing and manufacturing the finest gas operated water heating products in the world since 1951 and is the number one manufacturer in the world for tankless technology. Increased environmental awareness, with the conservation of energy and space worldwide, has encouraged Noritz to expand globally.

### Condensing Technology

## Noritz: Engineered To Extremely High Standards of Durability & Reliability

### PVC Adapter

Because the exhaust gas temperature is reduced significantly with our condensing units, less expensive PVC can be used for venting.

### Built-in Neutralizer

Only Noritz offers condensing units with a neutralizer built-in to neutralize the acidic condensate, making it safe to drain through your drainage system.

### Pressure Loss

Noritz tankless water heaters are designed to minimize pressure loss, while maintaining optimum temperature control, for the most comfortable experience.

### Stainless Steel Secondary Heat Exchanger

100% Stainless Steel. Built entirely of stainless steel materials, our secondary heat exchanger resists corrosion and is built to last.

100%  
Stainless  
Steel

### Tankless is Green

Noritz residential models meet or exceed the criteria set forth for **ENERGY STAR** qualification. With **ENERGY STAR** certification, you can rest with confidence a Noritz tankless will save energy and money.

### On Demand

Tankless water heaters heat water only when needed, eliminating the wasteful energy use of reheating stored hot water, which is standard with tank-type water heaters.

### Save Energy. Save Money.

With a Noritz tankless water heater, you'll save energy and thus, money. Our on-demand systems require no standing pilot light and can save about half the cost of your current water heating bill since there is no re-heating of water as with traditional water heaters.

### Commercial Grade Copper Heat Exchanger

Our heat exchanger has 25% thicker piping to help prevent condensation and erosion, ensuring a longer life.

#### Durability

Research shows that a competitor's heat exchanger would last an estimated 7.6 years before a leak occurred. The tests for the Noritz Commercial grade heat exchanger on the other hand, indicate that it would last more than twice as long - **an estimated 18.4 years** - before a leak occurred.

**12-year/6,500 hours Warranty in homes with hot water recirculation systems**

The heat exchanger is under warranty for 12 years (see warranty for conditions). Noritz will extend this same warranty up to a maximum of 6,500 operational hours if an aquastat, timer or other device is used to limit the use of recirculation during the day. We call this "controlled recirculation." See warranty for full details.

NR50	2.5 Showers	5.0 GPM	N/A for Winter Weather	

(Model numbers in parenthesis are commercial models. Assuming a standard 2.5 GPM shower head and 105°F output water temperature.)

## Space Saving Calculation

A traditional tank-type water heater takes up to 13 ft<sup>2</sup> of space. If 1 ft<sup>2</sup> is worth \$200, that's \$2,600 (13 ft<sup>2</sup> X \$200) worth of space you could be saving at Noritz

\* Installation must conform with local codes, or in the absence of local codes, the National Fuel Gas Code, ANSI Z223.1/NFPA 54.

## Flexible & Space Saving Installation

With the compact size and broad selection, Noritz tankless water heaters can be installed virtually anywhere. Indoor or outdoor, Noritz has the unit, venting and accessories needed for the job.

## Warranty Info

**12** year Heat Exchanger **5** year Warranty on Parts **1** year Reasonable Labor

### Basic Warranty

Noritz offers a 12-year residential warranty on the heat exchanger, a 5-year warranty on parts and 1-year reasonable labor. (Labor will be paid to an authorized Noritz Service Rep. on pre-approved warranty repairs.) The residential warranty on the heat exchanger is reduced to 3 years for the NR66 & NR71 Series if the product is supplied with circulated water. All residential series units supplied with pre-heated water will have warranty coverage on the heat exchanger for 3 years.

**12** year Recirculation Warranty **5** year Warranty on Parts **1** year Reasonable Labor

### Recirculation Warranty

Noritz offers an extension on the residential recirculation warranty on the following model series: **NR83, NR98, NRC111, and NR111.** The recirculation warranty will now cover 12 years or 6500 hours of operational time, whichever occurs first, as long as the recirculation pump is installed per our installation guidelines and is controlled at minimum with an aquastat. The extension does not apply to units supplied with pre-heated water.

## Federal Tax Credit

Noritz water heaters that meet ENERGY STAR qualifications are eligible for a federal tax credit of \$300. In addition to the federal tax credit, many local utility companies are recognizing the benefits of tankless water heaters and are encouraging this through rebates. Check with your installer, local utility company or [www.noritz.com/homeowners](http://www.noritz.com/homeowners) for available rebates.

# NORITZ HYDRONIC BOILER

## OUR WATER CONDITIONING SOLUTION:

- ✓ MAINTAINS ENERGY EFFICIENCY
- ✓ REDUCES MAINTENANCE
- ✓ REMOVES EXISTING SCALE

According to the United States Geological Survey, 89.3% of the US homes have hard water. Over 85% of Canada has a hard water problem.

Water Supply Classifications	
less than 3 gpg	Slightly Hard
3 to 7 gpg	Moderately Hard
7 to 10 gpg	Hard
10 to 14 gpg	Very Hard
over 14 gpg	Extremely Hard
gpg= grains per gallons	

**CONSEQUENCES OF HARD WATER:** The harder the water, the more aggressive it is on appliances, especially water heaters. Water that is heated allows the dissolved minerals to come out of solution and deposit inside the water heater. Over time this scale reduces the performance as well as the longevity of a water heater.

### H<sub>2</sub>FLOW: Hard Water Solution

**The Ultimate in Scale Protection**

H<sub>2</sub>FLOW is the answer to effectively handle hard water scale build up that can affect the performance of your appliance. This breakthrough technology has now been made available for all water heater types, including tankless, boilers, and tank type water heaters.

H<sub>2</sub>FLOW is an economical solution to hard scale build up that can help to protect your appliance for years to come.

Scale is an incrustation of calcium carbonate (CaCO<sub>3</sub>) that forms on pipes and heating elements. The H<sub>2</sub>FLOW uses TAC to attract hardness minerals that do not stick to pipes and components.

## 1st Asme Certified Tankless Hydronic Boilers For Residential & Commercial Applications.

Energy Efficient & Space Saving

Included Accessories	SV: Anchoring Screws, Power Cord OD: Anchoring Screws	SV: Anchoring Screws, Power Cord OD: Anchoring Screws

### Advanced features include:

- Commercial-grade copper heat exchanger made thicker to help resist corrosion.
- Pipe with larger diameter specifically designed for the boiler dramatically reduces pressure loss through the multi-pass heat exchanger.
- Standard integrated priority controls for DHW and hydronic heating systems from a single controller on the front panel.
- Two temperature settings; 1 for the DHW and 1 for the heating system.
- High temperature capability (up to 180°F). Nine temperature option settings.
- Low maintenance – minimal moving parts (fan and flow switch only).
- Durable, fully solid state controls.

### Warranty Info

10 year

Heat Exchanger

1 year

Warranty on Parts

### Boiler Warranty

Noritz offers a 10-year warranty on the heat exchanger and a 1-year warranty on parts.

# Commercial Advantage

Modular  
Multi-System  
Modulation  
Intelligent System

## Modular

The Noritz modular system is based on a single self-contained, interchangeable unit that can combine and communicate with like units to meet any hot water demand.

## Multi-System

Noritz units can be linked together with a single system controller, up to 24 units. This allows outputs of 9.1 million Btu/h and 316 gallons per minute.

## Modulation

Noritz fully modulating technology can track any hot water demand with pin point accuracy, only using the energy necessary to heat the water that is used.

## Intelligent System

In a multi-system setup, the Noritz commercial units will communicate with one another and work in unison to even out the load on each individual unit, maximizing output and system life. With the ability to modulate between multiple units with the use of a system controller makes Noritz commercial water heaters the most efficient water heating system on the market today.

## Fully Modulating Burner

Noritz's fully modulating burner technology is the most precise and efficient method of heating high fluctuating demands of water.

### Single Unit

**23:1 Turndown Ratio**  
11,000 - 250,000 BTU Range

### 24 Units (Modular)

**545:1 Turndown Ratio**  
11,000 - 6 Million BTU Range

(Specs based on NC250 model)

## Intelligent System

## Redundancy

Any one of the Noritz commercial units on a multi-system can be taken offline and serviced without compromising your business. Hot water will still be provided by the other units.

## Efficiency

Because of the modulating technology, a Noritz commercial system heats water using only the energy necessary to meet the demand, reducing energy consumption significantly and saving on water heating costs.

## Versatile Installation

Noritz commercial units can be installed indoor or outdoor and because of its size and weight, they can be wall hung or racked, making spaces once thought impossible, possible.

# ADVANCED SOLUTIONS

## Modular Concept

Noritz modular system can link up to 24 units. The system is based on a single self-contained, interchangeable unit that can combine and communicate with like units to meet any hot water demand.

## Commercial H2Flow

- Designed for all water heater types and models regardless of manufacturer
- Prevents the formation of scale to improve efficiency and prolongs the life of the water heater
- Uses no salt or harmful chemicals and provides a more environmentally friendly alternative to water softeners
- 3/4", 1", 1-1/4", and 2" connections available for quick and easy installations and servicing
- Low Maintenance - replace the H2Flow media once every three years
- High-capacity units are also available for unlimited service flow rates when manifolded

## Common Venting

Noritz offers common venting solutions for commercial installations. Our knowledgeable technical consultants are available at 866-766-7489.

## Racking Systems

- Pre-fabricated racking system for commercial multisystem installations
- Can hold 2 Noritz tankless water heaters back to back and provides mounting holes for a quick and precise installation
- Provides a time and labor saving solution when installing multiple water heaters
- Manufactured with highly corrosion-resistant steel that can withstand extreme environments
- Perfect for flat rooftop or mechanical room applications

## Warranty Info

**5** year Heat Exchanger

**5** year Warranty on Parts

### Commercial Warranty

Noritz offers a 5-year warranty on the heat exchanger and a 5-year warranty on parts.

# Concentric Venting for DVC Models

**DVC**

## Features:

- Push-on connection
- Single-wall penetration
- No need to cut - adjustable for easy installations
- Zero clearance to combustibles
- Use of superior anti-corrosion material 316L for outlet port
- Heat and chemical resistant flourine rubber O-ring for secure sealing

## Horizontal Installation

### Horizontal- Kits

**Standard Wall Kit**  
Includes inner & outer plates  
**CVK-H**  
Wall Thickness Range  
From 5.8"-13.2"

**Thick Wall Kit**  
Includes inner & outer plates  
**CVK-H2**  
Wall Thickness Range  
From 10.3"-17.8"
